

Sharing information about farm energy and rural issues since 1962

Sharing information about farm energy and rural issues since 1962

The Midwest Rural Energy Council is a membership organization whose mission is to support outreach, education and research on rural energy issues for the benefit of:

- farms and other rural energy consumers,
- rural energy suppliers,
- farm organizations and agricultural trade associations,
- electrical equipment and allied industries,
- government regulatory agencies.

Visit our website to learn more about our educational programs, conferences, workshops, and publications. www.mrec.org

MREC is sponsored by the University Extension Programs and by the Departments of Agricultural, Biological Systems, or Biosystems Engineering of Wisconsin, Minnesota, Iowa, and South Dakota.

Activities of the Midwest Rural Energy Council

Annual rural energy conference in February or March with presentations on the safe and efficient use of electrical energy on farms, renewable energy developments, distribution grid connection methods, agricultural wiring methods, and stray voltage investigation.

Half day pre-conference workshop for an in-depth look at technical topics such as agricultural wiring code, power quality, and advanced stray voltage measurement techniques.

Stray voltage investigator's courses in April or May with hands-on training at the introductory, intermediate and advanced levels.

Website with information on rural energy issues, publications, past conference presentations, and links to references and other resources. You can sign up for a newsletter on the website. www.mrec.org
